Review

DNA, mutations and aging (MTR 09001)
T.B.L. Kirkwood (U.K.) 1

Research Papers

Mitochondrial DNA rearrangements are correlated with a delayed amplification of the mobile intron (plDNA) in a long-lived mutant of *Podospora anserina* (MTR 09002)
H.D. Osiewacz, J. Hermanns, D. Marcou, M. Triffi and K. Esser (F.R.G., France) 9

Chromosomal instability in an oxygen-tolerant variant of Chinese hamster ovary cells (MTR 09003)
J.J.P. Gille, E. Mullaart, J. Vijg, A.L. Leyva, F. Arwert and H. Joenje (The Netherlands) 17

Human lymphocytes aged in vivo have reduced levels of methylation in transcriptionally active and inactive DNA (MTR 09004)
R.D. Drinkwater, T.J. Blake, A.A. Morley and D.R. Turner (Australia) 29

Age-associated changes in DNA methylation and mRNA level of the c-*myc* gene in spleen and liver of mice (MTR 09005)
T. Ono, N. Takahashi and S. Okada (Japan) 39

Age and strain dependence of O^6-methylguanine DNA methyltransferase activity in mice (MTR 09006)
Y. Nakatsuru, K. Aoki and T. Ishikawa (Japan) 51

Chromatin and nucleolar changes in Xeroderma pigmentosum cells resemble aging-related nuclear events (MTR 09007)
F. Puvion-Dutilleul and A. Sarasin (France) 57

Nicotinamide adenosine dinucleotide level in dimethylsulfate-treated or UV-irradiated mouse epidermis (MTR 09009)
B. Balard and P.U. Giacomoni (France) 71

Preface

F.H. Sobels 81

About an old problem, new approaches, a new section
C. Franceschi, R.B. Setlow, T. Sugimura and J. Vijg 83

Editorial

Molecular gerontology needs coordination
J. Vijg 87

Research Papers

P_1-450 and P_3-450 gene expression and maximum life span in mice (MTR 09008)
S.R. Spindler, A. Koizumi, R.L. Walford and P.L. Mote (U.S.A., Japan) 89

Age-dependent decline in rejoining of X-ray-induced DNA double-strand breaks in normal human lymphocytes (MTR 09010)
P.J. Mayer, C.S. Lange, M.O. Bradley and W.W. Nichols (U.S.A.) 95

Age-related demethylation of mouse satellite DNA is easily detectable by HPLC but not by restriction endonucleases (MTR 09011)
D. Howlett, S. Dalrymple and L.L. Mays-Hoopes (U.S.A.) 101

Age-specific methylation of high-mobility-group proteins of the rat liver and its modulation by spermine and sodium butyrate (MTR 09012)
M.K. Thakur and S. Prasad (India) 107

Effect of age on endogenous DNA single-strand breakage, strand break induction and repair in the adult housefly, *Musca domestica* (MTR 09013)
R.K. Newton, J.M. Ducore and R.S. Sohal (U.S.A.) 113

Age-dependent covalent DNA alterations (I-compounds) in rodent tissues: species, tissue and sex specificities (MTR 09014)
K. Randerath, J.G. Liehr, A. Gladek and E. Randerath (U.S.A.) 121

Congress Reports

XVIth International Congress of Genetics, Toronto, August 1988 (MTR 09021)
R.J. Shmookler Reis and P. Slagboom 135

0921-8734/89/$03.50 © 1989 Elsevier Science Publishers B.V. (Biomedical Division)

First EURAGE Meeting on Molecular Biology of Ageing, Crete, October 7–10, 1988 (MTR 09022)
S.I.S. Rattan 139

Editorial
DNAging: the forum for molecular biological research on aging
C. Franceschi 145

Hypothesis
A double-loop model for the replication of eukaryotic DNA
S. Spadari, A. Montecucco, G. Pedrali-Noy, G. Ciarrocchi, F. Focher and A. Hübscher (Italy, Switzerland) 147

Research Papers
Increased sensitivity of various genes to endogenous DNase activity in terminal differentiating chick lens fibers
A.S. Muel, M. Laurent, E. Chaudun, J. Alterio, R. Clayton, Y. Courtois and M.F. Counis (France, U.K.) 157
Evaluation of the reorganization in the high-order structure of DNA occurring during cell senescence
A. Macieira-Coelho and F. Puvion-Dutilleul (Sweden, France) 165
The presence of amplified regions affects the stability of chromosomes in drug-resistant Chinese hamster cells
M. Miele, S. Bonatti, P. Menichini, L. Ottaggio and A. Abbondandolo (Italy) 171
Chromosome instability in lymphocytes from a patient with Werner's syndrome is not associated with DNA repair defects
M. Stefanini, S. Scappaticci, P. Lagomarsini, G. Borroni, E. Berardesca and F. Nuzzo (Italy) 179
The tissue specificity of the age-related changes in alkali-induced DNA unwinding
J.M. Hartnell, M.C. Storrie and A.D. Mooradian (U.S.A.) 187

Review
Genetic toxicology of oxygen
H. Joenje (The Netherlands) 193

Research Papers
Clonal chromosome rearrangements in a fibroblast strain from a patient affected by xeroderma pigmentosum (complementation group C)
F. Nuzzo, P. Lagomarsini, A. Casati, R. Giorgi, E. Berardesca and M. Stefanini (Italy) 209
Heat shock mRNA in mouse epidermis after UV irradiation
S. Brunet and P.U. Giacomoni (France) 217
Chromosomal instability and progressive loss of chromosomes in HeLa cells during adaptation to hyperoxic growth conditions
J.J.P. Gille and H. Joenje (The Netherlands) 225
Mitomycin C-induced postmitotic fibroblasts retain the capacity to repair pyrimidine photodimers formed after UV-irradiation
H.J. Niggli, K. Bayreuther, H.P. Rodemann, R. Röthlisberger and P.I. Francz (Switzerland, F.R.G.) 231
DNA damage and repair in female C57BL/10 mice of different ages injected with the carcinogen benzo[*a*]pyrene-trans-7,8-diol
S.S. Ball, M.S. Neshat, M.R. Mickey and R.L. Walford (U.S.A.) 241
Decreased DNA repair in familial Alzheimer's disease
S.K. Jones, L.E. Nee, L. Sweet, R.J. Polinsky, J.D. Bartlett, W.G. Bradley and S.H. Robison (U.S.A.) 247
Micronucleus formation in different lymphocyte subpopulations in peplomycin-treated and control cultures
I. Slavutsky and S. Knuutila (Argentina, Finland) 257
Age-related methylation changes in DNA may reflect the proliferative potential of organs
E.G. Hoal-van Helden and P.D. Van Helden (South Africa) 263
O^6-Methylguanine-DNA methyltransferase in lymphocytes of the elderly with and without Alzheimer's disease
J.A. Edwards, L.-G. Wang, R.B. Setlow and E. Kaminskas (U.S.A.) 267
Cell-cycle defect of DNA repair in progeria skin fibroblasts
J.M. Lipman, A. Applegate-Stevens, L.A. Soyka and R.W. Hart (U.S.A.) 273
Age-dependent increase of DNA topoisomerase II activity in quail oviduct; modulation of the nuclear matrix-associated enzyme activity by protein phosphorylation and poly(ADP-ribosyl)ation
H.C. Schröder, R. Steffen, R. Wenger, Đ. Ugarković and W.E.G. Müller (F.R.G.) 283
Enhancement of 5′-nucleotidase activity of human leukemic cells after fractionation: implications for cancer and aging
A.S. Sun and M. Renaud (U.S.A.) 295
